25X1

1. Jet planes of the MIG-15 type are to be produced in Czechoslovakia.
2. Final assembly will be made in the Rudy Letov factory in Letnany near Prague. Parts will also be made at the Avia factory in Cakovice and the Aero factory in Prague-Vysocany, (sic).
3. Engines will come from the Motorlet factory. However, it is probable that complete engines will not be built at this place, but the main parts will be delivered by motor factories in the Soviet Union.
4. Parts and attachments will come from various factories including the Pal and Tesla plants. Dural plates must come from other places as Czech dural factories are still in their infancy.
5. Some work of this type has been in progress since 1952. There are no particular bottlenecks at present.
